

In the Claims

A1  
7  
1. (amended) Dewetting composition, comprising  
[characterized in that it is composed of] a solution of at least  
one surface-active agent in a mixture of at least one fluorinated  
solvent and of at least one polyfluorinated alcohol of [general]  
formula:

in which n is equal to 1 or 2 and Rf represents a linear or  
branched perfluoroalkyl radical containing from 4 to 8 carbon  
atoms.

sub 27  
2. (amended) Composition according to Claim 1, wherein  
the composition contains [containing] at least one alcohol of  
formula (I) in which n is equal to 2.

Claim 3, lines 1 and 2, delete "in which" and insert --  
wherein--.

A2  
sub 22  
4. (amended) Composition according to [one of] Claim[s] 1  
[to 3], [in which] wherein the fluorinated solvent has a normal  
boiling point of between 20 and 100°C[, preferably between 30 and  
75°C].

Claim 5, lines 1 and 2, delete "in which" and insert --  
wherein--.

A3  
sub 23  
6. (amended) Composition according to Claims 4 [or 5],  
[in which] wherein the fluorinated hydrocarbon <sup>No antecedent basis</sup> is [chosen]  
selected from 1,1,1,3,3-pentafluorobutane, 1,1,1,2,2,4,4-  
heptafluorobutane, 1,1,1,2,3,4,4,5,5,5-decafluoropentane,  
1,1,1,2,2,3,3,4,4-nonafluorohexane, 1H-perfluorohexane, n-

perfluorohexane, (perfluorobutyl)ethylene and perfluoro (methyilmorpholine).

1.7  
1.2  
7. (amended) Composition according to [one of] Claim[s] 1 [to 6], [in which] wherein the surface-active agent is a cationic surface-active agent obtained by reaction of a mono- or dialkyl phosphoric acid of [general] formula:

in which p is a number ranging from 1 to 2 and R denotes a linear or branched alkyl radical containing from 1 to 18 carbon atoms, with a quaternary ammonium chloride of [general] formula:

in which R' and R'', which are identical or different, each represent a hydrogen atom or an alkyl or hydroxyalkyl radical containing 1 to 4 carbon atoms, and a fluorinated amine of [general] formula:

in which R<sub>F</sub> represents a linear perfluoroalkyl radical containing from 2 to 20 carbon atoms, X represents a divalent bridge and the symbols R<sup>1</sup> and R<sup>2</sup>, which are identical or different, each represent a hydrogen atom or an alkyl or hydroxyalkyl radical containing 1 to 4 carbon atoms.

Claim 8, lines 1 and 2, delete "in which" and insert -- wherein--.

A4  
9. (amended) Composition according to [one of] Claim[s] 1 [to 8], [in which] wherein the content of polyfluorinated

alcohol(s) is between 0.1 and 30% by weight[, preferably between 0.5 and 5%].

10. (amended) Composition according to [one of] Claim[s] 1 [to 9], [in which] wherein the content of surface-active agent(s) is between 0.01 and 0.5% by weight[, preferably between 0.04 and 0.2%].

11. (amended) Composition according to [one of] Claim[s] 1 [to 9], [in which] wherein the form of a concentrate containing up to 30% by weight of surface-active agent(s).

12. (amended) [Use of a composition according to one of Claims 1 to 10] Method for [the] dewetting of solid surfaces comprising treating a solid surface with the composition of claim

Please add the following new claims:

13. Composition according to Claim 4, wherein the boiling point is between 30 and 75°C. *of what?*

14. Composition according to Claim 9, wherein the content of polyfluorinated alcohol(s) is between 0.5 and 5%.

15. Composition according to Claim 10, wherein the content of a surface-active agent(s) is between 0.04 and 0.2%.

#### REMARKS

Claims 1-15 are pending in the application. The amendments are merely formal in nature. New matter claims 13-15 have been added. Entry is solicited.
